

ICT & AI Tools Training Completion Report

Bansgadhi Municipality, Bardiya

Date: 9-10 January 2026

The **two-day ICT and AI Tools Training Program** was successfully completed on **10 January 2026** at **Bansgadhi Municipality, Bardiya**. This program was organized by the **Rotary Club of Central Banke** to help community school teachers strengthen their digital skills and use modern technology in their classrooms.

A total of **30 teachers from community schools** participated in the training. Throughout the two days, the teachers were active, curious, and highly motivated to learn new tools that could improve their teaching and support their students.

The training was facilitated by **Mr. Hom Raj Khadka**, who conducted the sessions in a friendly and practical

manner. His clear explanations and hands-on approach made it easy for teachers to understand and use both ICT and AI tools.

During the training, participants learned about basic computer skills, digital teaching resources, and the use of **AI tools** for lesson planning, content creation, quizzes, and classroom support. The training included demonstrations, practice sessions, and group discussions, which helped teachers learn by doing.

By the end of the program, teachers felt more confident in using technology and AI in their classrooms. Many shared that the training opened new ideas for making learning more interesting and effective for students.

Feedback from Participants

The overall feedback from the teachers was very positive. They appreciated the practical sessions, the helpful guidance of the facilitator, and the opportunity to learn about AI tools. Teachers expressed that the training was useful, relevant, and timely for modern education.

However, some teachers also shared that the two-day duration was too short to fully practice and explore all the tools.

Recommendations

Based on the feedback from participants, the following recommendations were suggested for future programs:

1. Motivation Session:

It is recommended to include at least **one hour of motivation and inspiration topics**, especially focused on teachers' role in digital education and personal growth.

2. Longer Training Duration:

It is strongly recommended to **increase the training duration by at least three more days** so that teachers can get more hands-on practice, deeper

understanding, and better confidence in using ICT and AI tools.

Conclusion

The ICT and AI Tools Training Program at **Bansgadhi Municipality, Bardiya** was successful and meaningful. With the strong participation of 30 teachers, the expert facilitation of **Mr. Hom Raj Khadka**, and the support from the **Rotary Club of Central Banke**, the program created a positive impact on community schoolteachers.

With a longer duration and added motivation sessions in the future, this training can become even more effective and transformative for teachers and students alike.
